NEW EcoWater HydroLink Plus®

EcoWater Systems introduces **HydroLink Plus® Wi-Fi Technology**, a smart water treatment system enhanced by **Wi-Fi Technology**.

Peace of mind

The system softens and treats your water while **monitoring water usage**, letting you know when softener salt is needed and send you alerts if potential issues are detected. This allows you to make adjustments to save money on utility bills, plus provides **peace of mind!**

A new relationship

HydroLink Plus® can be programmed to send alerts and diagnostics to your **local EcoWater dealer**, who will monitor the system and provide convenient **maintenance and service as needed.**

Smart Home technology

More people are aware of their water footprint and are taking steps to control their water usage in their homes.

EcoWater Systems HydroLink Plus® is an example of a water treatment system enhanced by **WiFi technology.**

HydroLink Plus® makes it possible to monitor and manage EcoWater water treatment systems and water usage via **smartphone, tablet or computer** from virtually **anywhere.**

Security and Interactivity

A **simple and secure online dashboard** provides appliance information at a glance, such as:

- Number of days until the salt is empty
- Cycle schedule
- Average daily water usage
- Water used today
- Liters of treated water remaining.

You can launch a regeneration and adjust your settings from anywhere !

Alerts service

Text Alert !

Email Alert !

HydroLink Plus® alerts you via **text or email** (as you wish !) when the **salt is low** and needs refilling, and if **potential issues** are detected, such as continuous water flow above normal usage threshold.

Alerts can be customized according to personal preference via the online dashboard.
